OBJECTIVE

Motivated and aspiring software developer with a strong foundation in C#, ASP.NET MVC, Java, Spring Boot (MVC and Web API), and front-end technologies. Passionate about designing and developing efficient, user-friendly, and scalable web applications. Adept at solving complex problems through innovative solutions and committed to continuous learning to stay updated with emerging technologies. Eager to contribute to a collaborative environment where I can leverage my technical skills, creativity, and dedication to excellence. Seeking an opportunity to work on challenging projects, enhance technical expertise, and achieve professional growth while delivering impactful software solutions.

PROJECTS

Football Ticket System | *Spring Boot, Keycloak, Docker, MariaDB, Stripe*

- Developed a Football Ticket System backend using Spring Boot, providing APIs for managing ticket sales and user interactions.
- Integrated Keycloak for secure user authentication and authorization, ensuring role-based access control.
- Utilized Docker for containerization, enabling consistent deployment across environments.
- Implemented MariaDB as the database solution, optimizing schema design for ticketing operations.
- Integrated Stripe for secure and seamless payment processing, supporting multiple payment methods and ensuring PCI compliance.
- Ensured seamless API documentation and testing to guarantee reliability, scalability, and maintainability.

Freelance Platform | *.NET Web API, SQL-Server, JWT Token, Bootstrap*

- Developed a freelance platform backend using .NET Web API, enabling freelancers and users to collaborate on projects. Freelancers can propose their services, and users can review and accept proposals for seamless project management.
- Implemented secure authentication and authorization using JWT tokens.
- Designed and developed a responsive front-end using Bootstrap for enhanced user experience.
- Integrated SQL Server for data storage and optimized database queries for performance.
- Ensured robust API testing and documentation for seamless integration and scalability.

Dog Adoption | *C#, Asp.net, Mvc, SQL-Server*

- Built a full-stack dog adoption platform using ASP.NET MVC and C/sharp, with a responsive front-end crafted in HTML, CSS, and JavaScript.
- Applied SOLID principles, dependency injection, and unit testing to ensure maintainable and reliable code
- Integrated SQL Server with Entity Framework for data management, and implemented secure user authentication with ASP.NET Identity.
- Managed version control with Git, enabling efficient collaboration and continuous integration.

TECHNICAL SKILLS

Languages: C#, Java, Python, SQL (Postgre, MariaDB), JavaScript, HTML/CSS

Frameworks: ASP.NET (MVC, Web API), Spring Boot

Developer Tools: GitHub, Git, Docker, Visual Studio, VS Code, IntelliJ, PyCharm, GitHub, Swagger, Postman

Authentication: Keycloak, JWT Tokens

Databases: SQL Server, MariaDB, PostgreSQL

Payment Integration: Stripe
